

Elevate your vending standards

Contrary to the popular belief that “standard” means “less”, our G-Drink Standard model is an automatic vending machine that leaves nothing to be desired from other models on the market. Equipped with SandenVendo's flagship cooling technologies and a vertical lift system, G-Drink Standards is available in two spacious models with 9 or 6 selections per shelf. Each model comes with a new LED illumination structure designed to enhance the visibility of the drinks displayed inside. Furthermore, our G-Drink Standard allows for dispensing glass bottles such as beer, champagne, and fresh juices at the perfect temperature.
