

Tabletop Vending with Thermoelectric Cooling System

UnoCool is SandenVendo's tabletop snack dispenser designed to meet the demands of a clientele with limited space availability, who aspire to deliver temperature-sensitive products.

Load all your favorite drinks and snacks in this new eco-friendly device: UnoCool is our first vending solution powered by a Thermoelectric Cooler (TEC) that cools products up to a minimum of 8° C.

Compact and space-saving, UnoCool is the perfect vending solution for venues such as pubs, office spaces, meeting rooms, sports facilities and hotel receptions
